

## Victor Fibre Needle Envelopes

Victor supplied fibre needles in packages like this in the 1920s, and included a sample package with each new Victrola.

### Instructions for use.

Create accurate facsimiles of the original Victor paper needle packages by printing this page using your color printer. The original paper used was similar in color to a modern kraft paper grocery bag, and of standard weight (20 lbs.). Cut out each of the two packages on each page by cutting around the thin red line. Fold the flaps over (a rectangular yellow box is provided for guidance) and glue the largest flap over the two unmarked flaps. Add up to 50 fibre needles through the open top flap, then glue this last flap in place.
